## CO2

The Confetti Booster II can be connected with different types of gas bottles.
With the 22,5kg bottle you can shoot up to 25kg of confetti or 60seconds.
With the 37,5kg bottle you can shoot up to 40kg of confetti or 90seconds.

## Accessories

The Confetti Booster II is provided with Co2 through a hose that is connected to a gas cylinder.
The CO2 hoses are for sale and rent in various lengths.

- 5m
- 10m
- 15m

### CO2 Hose
*The CO2 Hose supplies the Confetti Booster II with CO2. Connect male plug to the CO2 gas bottle. Connect the female plug to the CO2 Jet.*

### Quick Connector
*With the Quick connector a CO2 hose can easily be connected to a CO2 bottle.*
*Screw the Black side of the Quick connector on to the CO2 bottle. Plug the other side of the connector to the male side of the CO2 hose.*

### Loop Through Cable

*The function of the loop through cable is supplying multiple devices with a single power socket. Looping through the device should only be done without power. The first Confetti Booster II is connected to a power socket with the power socket to Powercon cable. The second Confetti Booster II is powered with the blue Powercon connector on the loop through cable. The grey side of the loop through cable connects to the grey connector on the first Confetti Booster II. Connect the Powercon by plugging the Powercon into the connector on the Confetti Booster II and turning it clockwise until you hear a click sound. Repeat this process for the rest of the Confetti Booster IIs.*

### Power Socket to Powercon cable

*The power socket to Powercon cable is the power cable of the Confetti Booster II. The power socket side connects to 230V 50-60HZ. The power connector connects to the Confetti Booster II. Connect the Powercon by plugging the Powercon into the Confetti Booster II and turning it clockwise until you hear a click sound.*

### TCM FX-Control
*The TCM FX-Control is designed to control multiple TCM products.*
*Connect the power socket to Powercon cable to the blue connector on the side of the FX Control.*
*Connect the Confetti Booster II to the FX-Control with the loop through cable.*
*Connect the blue side of the cable to the Confetti Booster II and the grey side of the cable to the back side of the FX Control.*
*When firing the Confetti Booster II first switch the key switch to unlock the panel.*
*Switch the safety switch to the right so the white dot is pointing upwards. When the red fire button is pushed, the Confetti Booster II will activate. Turn the safety switch to the left when the Confetti Booster II is not in use.*

*To connect multiple FX Control panels use the loop through cable. Connect the Blue side of the Powercon to the second FX-Control. Connect the grey side of the loop through cable to the grey connector on the FX-Control. Both FX-Controllers are now powered.*

**Warranty**

The Confetti Booster II has a 3 year warranty which will be void if the Confetti Booster II is handled differently than described in this manual.

The warranty is void when the Confetti Booster II has been opened by anyone other than the Confetti Maker.

The Confetti Maker is not responsible for any paint or hardware damaged as a result of rough handling.

CAUTION! Always contact your supplier in case of malfunctions. Never try to repair the Confetti Booster II yourself.
